

User Testing Materials

Follow one or more of the test cases and answer each question (if applicable). The test cases and questions are numbered so that they can be easily referenced. Please provide your answers in the same format. Please list which test case(s) you tried.

Example answer:

1. Test Case 1:
 - 1.1. [answer goes here]
 - 1.2. [answer goes here]
 - 1.3. etc...

1. Test Case 1: First Impressions

- 1.1. Upon opening any web page, are you able to tell what the page is about with reasonable ease? Are you able to tell what the website is about?
- 1.2. Does the website clearly communicate who Rosa is and why she is important?
- 1.3. Do you feel satisfied with what you have learned about Rosa? Do feel like there should be more information available on the website, or alternatively, that there is too much information?
- 1.4. Is any aspect of the visual design or content structure confusing upon a first viewing?

2. Test Case 2: Accessibility and Navigation

- 2.1. Is it easy to navigate around the website and within individual pages?

- 2.2. Is the hamburger menu (the navigation system in the top right corner) usable on both desktop and mobile?
- 2.3. Are the links and buttons large enough to be easily clickable on touchscreen devices?
- 2.4. If you have a screen reader or another kind of accessibility technology, is it easy for you to navigate around the site and understand the content?
- 2.5. If you change the screen size or switch to a different device, do any of your above answers change?

3. Test Case 3: Design and Usability

- 3.1. Do the visual cues (logo, headings, images, navigation menu) help in understanding the purpose of the website?
- 3.2. Is there enough contrast between the text and the background for it to be readable?
- 3.3. Is the website content (text, images, videos) easy to read or see? What if you change the screen size?
- 3.4. If you change the screen size or switch to a different device, do any of your above answers change?

4. Bonus: Recommendations

- 4.1. Do you have any recommendations for improvements I could make to the design, accessibility, usability, or navigation of the website?

Thank you for taking the time to participate!
